

Certificate of Achievement in Environmental Excellence

The IAAP's Environmental Committee recognizes producer member companies who have taken exemplary strides to comply with the multitude of Federal, State and local regulations concerning the protection of our air, water and land. These efforts not only reward the company specifically, they reward the industry, and may help to enhance the public's perception of both in the process. Illinois EPA Director Alec Messina was on hand to congratulate the following recipients during the IAAP Convention in February.
