Products/Services: Full Circle Industrial specializes in industrial maintenance with a strong focus on equipment reliability and customer support. Originally a repair shop for speed reducers and pumps, FCI has evolved to distribute a wide variety of industrial equipment and components while continuing to provide equipment repairs and diagnostic equipment and other cause analysis for various industries. Our expert team focuses on delivering high-quality solutions exactly when needed. Beyond standard services, FCI develops customized training programs for maintenance teams, ensuring production plants run efficiently and reliably. By implementing best practices and innovative strategies, FCI reduces downtime, optimizes equipment performance, maximize operational cost-efficiency, and enhances overall productivity for our clients. Our mission is to serve others, deliver on our promises and continuously improve results, ultimately increasing return on investment by minimizing waste and downtime. Our services include: MRO/OEM Parts; Reliability Services; Capital Projects; Mechanical & Electrical Rebuilds; Site Surveys; OEM Conversions; Field Service; Fabrication.

Products/Services: Environmental Legal Services: The goal of HeplerBroom's environmental practice group is to assist clients in attaining and maintaining compliance with the increasingly complex maze of environmental laws and regulations. Our team helps its clients by gaining a thorough understanding of their situations, assisting in developing goals for resolving whatever issues they face, and applying its attorneys' experience, skill, and creativity to reach those goals.; The broad range of environmental regulatory services provided by HeplerBroom includes permitting in all phases of air, land, and water issues.; The firm advises as to solid waste, hazardous waste, and wastewater management as well as underground and aboveground storage tank matters. The firm has participated in siting of landfills and other pollution control facilities, in matters concerning livestock facilities and coal mines, and in matters relating to the transportation of hazardous materials.; HeplerBroom also conducts compliance assessments and planning for new regulations and prepares stakeholder comments in rulemaking proceedings. The firm assists in compliance audits for all environmental media and workplace safety issues.; The firm routinely counsels its clients regarding environmental issues that arise in property and asset transactions. This includes Phase I and II investigations, drafting and negotiation of contractual provisions and consultation as to site remediation. The firm also assists companies in emissions trading matters, including negotiating trades, preparing trade agreements and securing necessary regulatory approval.; The firm's attorneys practice extensively before administrative tribunals, and state and federal trial and appellate courts. HeplerBroom provides vigorous advocacy in enforcement defense, litigation of private claims based on environmental issues, and proceedings for regulatory relief.

Eric Marcotte, VP of Sales

Products/Services: Stedman Machine Company offers a wide range of services for the aggregate industry by continuously creating and improving equipment to help increase production, decrease maintenance and improve overall efficiency. A complete line of size reduction equipment provides access to the best equipment for the process, instead of modifying the process to fit the equipment. Stedman works closely with customers to determine the best, most cost-effective, efficient size reduction method and equipment for specific applications, “Your solution to size reduction.” Stedman’s size reduction equipment includes: Cage Mills, Grand Slam™ and Mega Slam™ Horizontal Shaft Impactors, V-Slam™ Vertical Shaft Impactors, Hammer Mills, Aurora Lump Breakers, and Micro-Max™ Air Swept Fine Grinder. Stedman operates a complete testing and toll processing facility staffed by experienced technicians with full-scale equipment, allowing customers to witness accurate crushing test results, predicted output capacities and processing data. Support services include system design and 24-hour parts and service.
